

# High speed Bell cleaner

## Ecco Bell Cleaner

**New!**

Based upon Ecco's proven Cap Cleaner, this tailor made solution is brought straight to the paint robot. Easy to install, the Ecco Bell Cleaner allows instant high Speed Bell cleaning with controlled solvent and drying air spraying.

Installed on automotive paint lines in Sweden, it is enabling continuous production without spraying device maintenance for over 36 weeks (coupled with Ecco 75AP spraygun). Design can be adapted to any type of high speed bell for optimal automatic cleaning without generating production downtime.

### ADVANTAGES WITH ECCO BELL CLEANER

- Taylor made for each Bell type upon request
- Fast and efficient action (a few seconds for process completion)
- Easy to install even in cramped spaces
- Fully Corrosion Resistant (Stainless Steel and Plastics)
- ATEX certified
- Flexible cleaning solvent collection
- Protect Bell from mechanical wiping, reduces damage risks
- Long life time with no maintenance (no internal mechanical part moving)

#### TECHNICAL DATA - ECCO BELL CLEANER

Size	d=350/w=300/h=400mm
Body/frame material	Stainless Steel
Solvent pressure	15 bar
Pneumatic pressure	6-10 bar
Solvents permitted	all types for painting
Rec. spraying time	2-5 sec.
Rec. drying time	2-5 sec.
Weight	21 kg

**CUSTOMIZED FINISHING AND SEALING SOLUTIONS**
